

## Storm Data and Unusual Weather Phenomena - May 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>ILLINOIS, Central</b>				
<b>LAWRENCE COUNTY --- 3.2 E BILLET [38.67, -87.59], 2.4 SE BILLET [38.65, -87.62], 1.3 N BILLET [38.69, -87.65], 1.6 NW BEMAN [38.74, -87.62], 4.8 ENE BEMAN [38.74, -87.51], 4.6 ESE BEMAN [38.70, -87.52], 4.2 SE BEMAN [38.68, -87.54]</b>				
	05/03/11 06:00 CST	0		Flash Flood (due to Dam / Levee Break)
	05/05/11 09:45 CST	0		Source: Emergency Manager
Early in the morning of May 3rd, saturated ground from recent heavy rains and very high levels of the Wabash and Embarras Rivers resulted in three breaches of the Cross Levee, near the confluence of the two rivers. Nearly 30 square miles of bottomlands and farmland were inundated. Multiple roads were closed due to the high water between the Wabash River, the Embarras River and about 1.5 miles north of U.S. Highway 50. The town of Westport, IL was surrounded by water, and all roads in and out of town were closed. Several businesses in town sustained flood damage. Six homes on the south side of Lake Lawrence were also surrounded by water and sustained minor damage.				
Numerous rainfall events in late April combined with rounds of heavy rain on May 1st and 2nd to produce very high water levels on the Wabash and Embarras Rivers in eastern Lawrence County. Near the confluence of these two rivers, the Cross Levee, about 5 miles southeast of Lawrenceville breached in the three places, producing extensive flash flooding in much of southeast Lawrence County.				
<b>VERMILION COUNTY --- 3.0 NW DANVILLE [40.16, -87.66]</b>				
	05/07/11 16:13 CST	0		Hail (0.88 in)

	05/13/11 19:00 CST		0	Flash Flood (due to Heavy Rain)
	05/13/11 21:30 CST		0	Source: Emergency Manager

Thunderstorms with very heavy rain produced rainfall rates of 2.00" per hour for about two hours in eastern Tazewell County. This produced extensive flooding of many streets, rural roads and creeks. The most affected areas extended from Washington to east of Morton, through Mackinaw to just north of Hopedale.

## Storm Data and Unusual Weather Phenomena - May 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>CHRISTIAN COUNTY --- 3.3 WSW MORRISONVILLE [39.41, -89.53], 2.6 NW VANDERVILLE [39.46, -89.33], 3.5 WNW ASSUMPTION [39.53, -89.11], 1.1 SW DUNKEL [39.46, -89.09], 5.2 SSW VANDERVILLE [39.36, -89.34], 0.1 ESE HARVEL [39.35, -89.53]</b>				
	05/13/11 19:50 CST		0	Flash Flood (due to Heavy Rain)
	05/14/11 00:00 CST		0	Source: Emergency Manager
Thunderstorms with very heavy rain produced rainfall rates of nearly 3.00" per hour in southern Christian County resulting in flash flooding. Most rural roads south and east of Illinois Route 48 from Morrisonville to Owaneco to the Montgomery County line were impassable the entire evening.				
Low pressure moving across central Illinois triggered scattered strong thunderstorms during the evening of May 13th. A few of the storms produced large hail and locally heavy rainfall across Tazewell County and Christian County.

A power pole was snapped and a 3-foot diameter tree was blown down 1 mile north of Indianola.				
Low pressure tracking along a nearly stationary frontal boundary brought severe thunderstorms into southeast Illinois during the afternoon of May 23rd. The storms originated in southwest Missouri, then moved northeastward in the form of a bow echo into east-central and southeast Illinois. Widespread winds of 60 to 70 mph downed numerous trees and powerlines along and southeast of an Effingham to Danville line.

<b>CLARK COUNTY --- MARSHALL [39.38, -87.70]</b>				
	05/25/11 19:12 CST		0	Thunderstorm Wind (EG 52 kt)
	05/25/11 19:17 CST		0	Source: Emergency Manager
Numerous trees and power lines were blown down across Marshall. In addition, several homes sustained roof damage.				
A deep area of low pressure lifting from the Plains into the Upper Midwest pulled a strong cold front eastward toward the Mississippi River during the afternoon of May 25th. Severe thunderstorms developed ahead of the cold front, as well as along a warm front lifting northward through the area. Many of the storms produced large hail up to the size of golf balls and damaging winds in excess of 60 mph. In addition, 6 tornadoes touched down across central Illinois, including an EF2 tornado that caused significant damage south of Robinson in Crawford County.

## Storm Data and Unusual Weather Phenomena - May 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Several large tree limbs were blown down.				
<b>KNOX COUNTY --- 2.9 NW RIO [41.15, -90.44], 3.6 NE ALTONA [41.15, -90.11], 0.8 ESE ONTARIO [41.08, -90.29], 1.3 WNW HENDERSON GROVE [41.02, -90.44]</b>				
	05/29/11 10:00 CST		0.10M	Flash Flood (due to Heavy Rain)
	05/29/11 15:00 CST		0	Source: Trained Spotter
Severe thunderstorms produced heavy rainfall for the second time within five days in northwest Knox County. Once again, the greatest impacts were near the town of Rio where 3.00 to 5.00" of rain occurred during the morning of May 29th. Many roads in this area were impassable, including U.S. Highway 150 about one mile north of Rio, where Polk Creek overflowed its banks and a landslide blocked one lane of the highway.				
<b>PEORIA COUNTY --- 0.6 NE NORWOOD [40.71, -89.69]</b>				
	05/29/11 10:55 CST		30K	Thunderstorm Wind (EG 52 kt)
	05/29/11 11:00 CST		0	Source: Law Enforcement
Several trees and powerlines were blown down west of Peoria in the Jones Hollow area.				
<b>PEORIA COUNTY --- PEORIA [40.70, -89.60]</b>				
	05/29/11 10:55 CST		60K	Thunderstorm Wind (EG 52 kt)
	05/29/11 11:00 CST		0	Source: Law Enforcement
Numerous tree limbs were blown onto powerlines throughout the city of Peoria.				
<b>WOODFORD COUNTY --- EL PASO [40.73, -89.02]</b>				
	05/29/11 11:20 CST		3K	Thunderstorm Wind (EG 52 kt)
	05/29/11 11:25 CST		0	Source: Emergency Manager
A 1 to 1.5-foot diameter rotten tree knocked down powerlines at the intersection of US 24 and IL 251.				
Thunderstorms initiated across eastern Iowa during the morning of May 29th, then tracked eastward along a stationary frontal boundary into north-central Illinois. A large bow echo signature developed, with the strongest winds remaining north of a Galesburg to Henry line. Further south...minor wind damage and flash flooding occurred...especially across parts of Knox, Peoria, and Woodford counties.
